Phase 1

Complete MVP

- Develop MVP to demonstrate payment and access
- Test beta version with select users
- Start development of blockchain/Charge API

Phase 2

Launch Mobile App

- Launch app in select test market (Austin, TX)
- Revise mobile app based on user feedback
- Expand launch to EV-dense market areas

Phase 3

Develop Market Platform

- Develop purchase platform for energy transfer
- Complete DPKI Transactions to settle on Solana
- Wallet to wallet direct payments B2C & B2B

Road Map

Phase 4

OEM & Utility Partnerships

- Launch platform after testing
- Partner with EV automakers align on bi-directional
- Onboard utilities, CPOs, and other energy provides

Phase 5

Ecosystem Sustainability

- Support ongoing ecosystem growth
- Introduce Charge utility token
- Structure foundation for long-term sustainability
